

Outstanding Floors

Exceptional Service

BUSINESS CARD

## Gymnasium Recoat Service

Game Day Flooring's **clean, screen and recoat** service can save you tens of thousands of dollars, and the risk of full floor replacement. We have been specializing in this service for over 10 years. This service:

- Adds protective layers of finish periodically over time
- Delays the need to resand the floor
- Can extend the life of a gymnasium floor by up to 50%

### Recoat within 2 to 8 years to save the hardwood

Allowing excessive wear to build up over a 2 to 8 year period often results in the need for expensive, full resanding. This is because exposed wood flooring (not protected by finish layers), is easily damaged by foot traffic. At this point a full resanding and finishing is needed to create a smooth surface and lasting wood flooring protection.

Schools, Community Centers, Health Clubs and Churches throughout the province choose Game Day Flooring to supply, install and finish their gymnasium, aerobic and stage floors.

We offer several services to help extend the life of your floor:

- A free floor assessment once every one to four years
- Trained and experienced floor finishing professionals
- Quality equipment, materials and resources to get the job done right and on time
- Oil modified finish to create a lasting luster
- Moisture-cured finishes that gives superior performance
- The strongest water-based finish technology available
- Line and logo paint touch ups
- The best warranty available

## Gymnasium Full Resand and Finish

Game Day Flooring's **full resand and finish** can revitalize your sports flooring saving you thousands on a new floor. We have been specializing in this service for over 10 years. This service:

- Gives an almost brand new floor look
- Delays the need to tear out and install new material
- Can extend the life of a gymnasium floor by a minimum of 10 years

### Resand within 10 to 20 years to save the hardwood

It is important to resand your floor when it is needed in order to save you money. Depending on the wear that your floor endures, it is important to resand when the finish is too thick or too thin. At times floors get over looked and are not recoated within the time necessary, causing thinning layers

of finish on your floor. This results in wood exposure, leading to a resand. On the other end of the spectrum, many floors get over treated by excessive recoats. This will make the gymnasium appear smaller, darker and call for a costly resand immediately.

We offer several services to help extend the life of your floor

- A free floor assessment once every one to four years
- Trained and experienced floor finishing professionals
- Quality equipment, materials and resources to get the job done right and on time
- Oil modified finish to create a lasting luster
- Moisture-cured finishes that gives superior performance
- The strongest water-based finish technology available
- Line and logo paint touch ups
- The best warranty available
